Prime Colors

Within the Floorservice Prime Design Line we developed four new primer-products; Prime Colors. These Prime Colors offer various new unexpected finish-possibilities. The Prime Color range consists of the following colours:

- Prime Color White
- Prime Color Black
- Prime Color Grey
- Prime Color Brown

When applying the Prime Colors, varying with the intensity of buffing allows for different effects ranging from very light, almost transparent up to full intense colouring. By afterwards applying one of our 33 colours Floorservice hardwax-oil you will get the most beautiful finishes. Patterns in the wood will be extra highlighted. Also choosing one of our metallic oils will create the most stunning results.

Prime Color Brown
finished with
Floorservice Hardwax-oil

The colours displayed are examples of coloured Hardwax-oil on oak rustic. The look and feel and therefore the end results strongly depend on the type of wood, the sorting and the pretreatment of it. Because wood is a natural product, these colours may vary. We recommend you carry out a test beforehand, in order to determine the colour.
