Prime old Grey I V X

Prime Old Grey I, V and X

A complete new technology where the Prime Old Grey in combination with the existing colors of the Floorservice range takes care of many surprising and exciting new color effects. Prime Old Grey is especially designed to give a weathered appearance to oak. This water-based product offers very attractive market possibilities for both industrial and manual application. The possibilities and variations are numerous and that is of course very interesting since it leads to various creative and commercially attractive shades by finishing the floor subsequently with one of the 27 standard colors of the Floorservice Hardwax-oil Classic, Pro or Profiline.

Floorservice Hardwax-oil

The colours displayed are examples of coloured Hardwax-oil on oak rustic. The look and feel and therefore the end results strongly depend on the type of wood, the sorting and the pretreatment of it. Because wood is a natural product, these colours may vary. We recommend you carry out a test beforehand, in order to determine the colour.
