

## WINFLEX- VINYL FLOORING

WINFLEXR vinyl flooring unites the two most desirable characteristics of floorings: beauty and durability.

It presents a floor that is unbelievably durable and at the same time attractive in form, appearance and texture. Specially selected wood patterns that come to life in these numerous styles appear very realistic; this can be made to happen by uniting the newest achievements in technology, imitation of appearance, wood texture and surface protection. The beauty and durability of these products goes hand in hand with their simplicity of installation.
